DETAILED ACTION

Abstract

The Abstract is objected to because it does not contain a single paragraph within a separate sheet. Correction is required.

Specification

The specification has been checked to the extent necessary to determine the presence of all possible minor errors. However, the applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 14-15 and 17 are rejected under 35 USC 102 (b) as being anticipated by Erckert (US 6,100,742).

Erckert discloses in Figure 1 a circuit comprising:

- a first current source (32);
- a n output transistor (36);
- a mirror transistor (42);
- a miller capacitor (39); and
- a switch (46) that is configured to selectively couple the mirror transistor (42) and the output transistor (36) that controls the bias current through the output transistor (36).

Allowable Subject Matter

Claims 2-13 and 16 would be allowable if rewritten or amended to include the limitations of the base claim. These claims are allowed because the prior art of record fails to suggest the amplifier for comparing the output voltage with the reference voltage as combined in claim 2, and “the second current mirror and third current mirror” as combined in claim 12.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to DINH T. LE whose telephone number is (571) 272-1745. The examiner can normally be reached on Monday-Friday (8AM-7PM).
